iWALKFree™

**HIGH-PERFORMANCE
HANDS-FREE REHABILITATION**

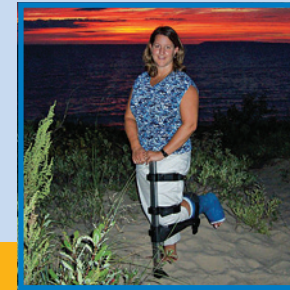

UK Sales: www.peglegs.co.uk
Manufacturer: www.iwalk-free.com

Lightweight, comfortable and inexpensive, iWALKFree is an award-winning orthosis designed to meet the needs of active people with non-weight bearing lower leg injuries or amputation.

The orthosis supports the knee and upper leg using a **tool-free** universal fastening system that allows for rapid adjustment for patient height and leg size.

Easily manage your daily activities. Play with your kids, cook, get up and down stairs, use public transport, work, exercise, or go shopping.

“iWALKFree was the difference between me being able to carry on working or not when I snapped my Achilles.”

**SIMON RIMMER, CHEF PATRON,
TV PRESENTER AND AUTHOR**

About the iWALKFree hands-free crutch

❖ BEAM WITH TREAD

Engineered to be lightweight and sturdy, and allows for instant tool-less adjustment.

❖ LOCKING PLATFORM

Adjustable locking platform can be fitted for either left or right leg.

❖ PADDED LEG STRAPS

Adjustable straps allow for comfortable fit.

❖ CAMS

Easily adjustable fastening system accommodates different heights and leg sizes.

“I’ve been very happy with the iWALKFree. I walk hands-free around the house, and I’m able to do most tasks. I’m just pleased to be able to cope alone.”

GILL, FRANCE

“I know how grim it is using ordinary crutches. The iWALKFree is just what you need if you live on your own, or if you value your independence.”

KIM, SHROPSHIRE
